

T. ROWE PRICE FUNDS SICAV

## Global High Income Bond Fund – ESG Report

Providing transparency on Environment, Social and Governance aspects of the Fund

As of 31 December 2024

### ESG APPROACH

- Our central mission is to help our clients reach their long-term financial goals and we believe that incorporating ESG factors into our investment process alongside financials, valuation, macro-economics and other factors is consistent with that objective. Our philosophy is that ESG factors are a component of the investment decision – meaning that they are not the sole driver of an investment decision, nor are they considered separately from more traditional analysis.
- The process of ESG integration takes place on two levels: first, with our research analysts as they incorporate environmental, social and governance factors into issuer valuations and ratings; and, second, with the portfolio manager as he balances these ESG factor exposures at the portfolio level. Both the analysts and portfolio manager are able to leverage dedicated, in-house resources to assist them in analyzing ESG criteria.
- Our ESG specialist teams provide investment research on ESG issues at the company level and on thematic topics. Additionally, they have built tools to help proactively and systematically analyze the environmental, social, and governance factors that could impact our investments. The foundation of the analysis is a proprietary flagging tool called the Responsible Investing Indicator Model (RIIM). It covers over 15,000 companies and pulls from data sets that are not in the wheelhouse of traditional financial analysis. These data sets include:
  - ESG performance data (e.g., number of accidents, carbon emissions, strength of whistle-blower programs, etc.);
  - ESG targets (e.g., plans to reduce carbon emissions, increase diversity, etc.)
  - ESG incidents and controversies (e.g., environmental fines paid, local community controversies/protests against a company, etc.)
- Our Global High Income Bond Fund seeks to generate alpha by focusing on proprietary, bottom up research to identifying companies offering long-term performance potential. The Global High Income investment team examines each potential investment; each holding; and the entire portfolio with an approach deeply rooted in fundamental analysis along with a macro and industry top-down view. These processes naturally incorporate an analysis of each company's environmental, social, and governance factors and tend to yield an ESG-friendly portfolio. However, our Global High Income investment team collaborates closely with our ESG specialists to augment their work. We also screen the portfolio using T. Rowe Price's proprietary RIIM analysis at regular intervals. This helps us understand the ESG characteristics of the portfolio and makes us aware of any exposures to specific ESG factors or how these ESG factors may impact a company's business operations and market performance.
- The fund is classified as Article 8 according to the Sustainable Finance Disclosure Regulation. Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments. The fund avoids issuers whose activities we may consider harmful to the environment and/or society through the application of our proprietary screen, the T. Rowe Price Responsible Exclusion List.

**INVESTMENT OBJECTIVE:** To maximise the value of its shares through both growth in the value of, and income from, its investments.

**INVESTMENT PROCESS:** The fund is classified as Article 8 under SFDR (the EU's Sustainable Finance Disclosure Regulation); it promotes, among other characteristics, environmental and/or social characteristics and the companies in which the investments are made follow good governance practices. The fund is actively managed and invests mainly in a diversified portfolio of high yield corporate bonds from issuers around the world, including emerging markets. Although the fund does not have sustainable investment as an objective, the promotion of environmental and/or social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in sustainable investments, as defined by the SFDR. In addition to the E/S characteristics promoted, the fund also applies the investment manager's proprietary responsible screen (the T. Rowe Price Responsible Exclusion List). The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in debt securities and credit indices. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

**This marketing communication is for investment professionals only. Not for further distribution.**

## RECENT COMPANY ENGAGEMENTS

We maintain a regular dialogue with the management teams of companies represented across the portfolio. Our investment-driven engagement program frequently identifies targets through our proprietary RIIM analysis, governance screening and analysts' fundamental research. While we engage with companies in a variety of different contexts, ESG engagement focuses on learning about, encouraging or exchanging perspectives on the environmental practices, corporate governance or social issues affecting their business.

While most of the meetings we hold with company managements will include some discussion of ESG topics, we differentiate meetings held with a heavy focus on ESG, meaning ESG issues were the sole items on the agenda or made up a meaningful part of the meeting. Agenda items are classified as "meaningful" when they take up a significant portion of the meeting or are a significant factor in the investment case.

The following are selected examples of recent engagements with companies held in or considered for the portfolio. The examples are not meant to be representative of every engagement held, but to illustrate the types of ESG engagements we are having with the managements of our investment companies.

## CVS Health (4<sup>th</sup> Quarter 2024 Engagement)

<b>Focus</b>	Environment, Social
<b>Company Description</b>	CVS Health provides health care and retail pharmacy services.
<b>Engagement Objective</b>	We engaged with CVS Health on cybersecurity; health equity; and ESG disclosure.
<b>Participants</b>	<p>From CVS Health: Senior Vice President (SVP), Chief Sustainability Officer; SVP, Chief Governance Officer, Corporate Secretary &amp; Assistant General Counsel; VP, Compensation &amp; Workforce Analytics; Executive Director, Investor Relations</p> <p>From T. Rowe Price Associates, Inc.: Head of Corporate Governance; Responsible Investing Analyst</p>
<b>Engagement Outcome</b>	<p>We engaged with CVS Health to provide feedback on its approach to cybersecurity and health equity. Despite significant cyber risk exposure, the company provides relatively limited transparency in this area.</p> <p><b>Cybersecurity</b></p> <p>We discussed the company's approach to cybersecurity in light of the high-profile Change Healthcare cyberattack at UnitedHealth and spate of cyberattacks across the health care sector during 2024. CVS Health continues to make significant investments in this area and pointed to the significant ongoing risk related to third-party systems.</p> <p>We requested the company provide more transparency on oversight for cybersecurity/data privacy and preventative measures undertaken to avoid breaches (e.g., ISO 27001 certification, threat penetration testing, employee training) in its sustainability disclosure. The company's main impact report makes no reference to this topic. We will monitor for progress.</p> <p><b>Health equity</b></p> <p>CVS Health also provided an update on its health equity efforts. This continues to be a significant focus of the sustainability efforts of all managed care organizations or MCOs. We reiterated our interest in additional disclosure in this area. Several companies provide additional information regarding chronic condition outcomes and have set public targets related to various National Committee for Quality Assurance (NCQA)/Healthcare Effectiveness Data and Information Set (HEDIS) variables, for instance. CVS Health has not yet provided the requested disclosure, but it was receptive to the request and we extended the deadline.</p> <p><b>ESG disclosure</b></p> <p>CVS Health's Scope 3<sup>1</sup> emissions data have been highly volatile—we therefore also briefly touched on the company's approach to carbon accounting. The year-to-year swings have been driven by changes to the company's approach to measuring emissions from purchased goods and services. The company is seeking to increase the use of primary data (rather than spend-based estimations) to provide a more consistent baseline.</p> <p>We also provided feedback that the company should look to consolidate its various ESG reporting documents into a single report. The existing format makes it challenging for users to find relevant information.</p> <p>The engagement allowed us to share our view on ESG disclosure and suggest additional transparency in several areas. Namely, we recommended the company enhance its disclosure on cybersecurity matters (e.g., management oversight and information on preventative measures undertaken by the company).</p>

<sup>1</sup> Scope 1: direct emissions from owned or controlled sources; scope 2: indirect emissions from the generation of purchased electricity, steam, or cooling; scope 3: all other indirect emissions.

Unless otherwise noted, data were provided by the company during the engagement or are available through company reports.

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the SICAV sub-fund, and no assumption should be made that the securities identified and discussed were or will be profitable.

## Banca Transilvania (4<sup>th</sup> Quarter 2024 Engagement)

<b>Focus</b>	Environment, Governance
<b>Company Description</b>	Banca Transilvania is a large Romanian bank.
<b>Engagement Objective</b>	We engaged with Banca Transilvania to discuss various ESG issues (e.g., climate strategy, sustainable financing framework, appetite for blue bond issuance, and compensation disclosure).
<b>Participants</b>	From Banca Transilvania: Head of Corporate Governance; Sustainability Representative; Investor Relations Representatives From T. Rowe Price Associates, Inc.: Head of Corporate Governance, EMEA and APAC; Responsible Investing Analyst
<b>Engagement Outcome</b>	<p>We engaged with Banca Transilvania to focus on a range of ESG topics, including climate strategy, sustainable financing framework, demand for blue bonds, and remuneration disclosure. Our meeting followed several earlier engagements over the past 18 months on climate and sustainable financing topics. While Banca Transilvania measures financed emissions, it falls behind best practice in not setting any financed emission reduction targets, and we reiterated several previous asks during our call. We also shared our views on management's remuneration disclosure, which is not aligned with investors' expectations.</p> <p>Banca Transilvania's climate strategy is relatively advanced for the region, having measured financed emissions across the entire loan book (most of its peers have measured 60%–70% of their loan book). However, it lags global leaders in not having any financed emissions reduction targets. We discussed the bank's appetite for target setting for key sectors (i.e., agriculture, transport, and construction) and reiterated our desire to see the bank set these goals.</p> <p>Regarding sustainable finance, management said that the bank is on track to meet its 2023–2025 green financing target, with most of the financing coming from renewable energy, clean transport, green buildings, and water efficiency projects. The bank walked us through its pipeline of eligible assets for blue financing, including loans to small to mid-sized enterprises. We also discussed blue bonds issuance following a EUR 100 million financing loan the bank received from the International Finance Corporation for water-related lending in 2022. Though Banca Transilvania increased water-related lending in 2024, it does not want to issue a blue bond due to its limited size in the portfolio.</p> <p>Regarding governance, Banca Transilvania's remuneration disclosure does not meet investors' expectations for a European company. Following shareholder feedback, the bank plans to disclose the collective key performance indicators (KPIs), the corporate targets shared by the top managers, which we regard as a positive step for the 2025 meeting. However, the bank refused to disclose individual KPIs assigned to top management, citing confidentiality reasons. We pointed out that other European banks disclose individual KPIs in their short- and long-term incentive plans and that investors find this information valuable.</p> <p>The engagement gave us an opportunity to offer our feedback on the bank's climate strategy and remuneration disclosure. We will monitor for Banca Transilvania to set financed emissions reduction targets for key sectors by the end of 2025. We will also monitor for the bank to disclose remuneration-related KPIs.</p>

Unless otherwise noted, data were provided by the company during the engagement or are available through company reports.

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the SICAV sub-fund, and no assumption should be made that the securities identified and discussed were or will be profitable.

## ESG RIIM PROFILE

The T. Rowe Price Responsible Investing Indicator Model (RIIM) rates companies, governments and securitized assets in a traffic light system measuring their environmental, social, and governance profile and flagging issuers with elevated risks. For certain types of investments, including, but not limited to, cash, currency positions, and particular types of derivatives, an ESG analysis may not be relevant or possible due to a lack of data. Where ESG considerations are integrated into the investment research process, we may conclude that other attributes of an investment outweigh ESG considerations when making investment decisions.

	Portfolio		Benchmark	
	No. of securities	% weight	No. of securities	% weight
● Green	162	61.7	1,903	58.7
● Orange	69	26.1	620	22.4
● Red	0	0.0	67	2.0
● Not in scope	0	0.0	6	0.1
● Not covered	20	9.8	626	16.8
● Reserves	1	2.5	0	0.0
<b>Total</b>	<b>252</b>	<b>100.0</b>	<b>3,222</b>	<b>100.0</b>

● No/few Flags ● Medium Flags ● High Flags

The comparator benchmark of the Fund is the ICE BofA Merrill Lynch Global High Yield Index Hedged to USD. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

## SUSTAINABILITY INDICATOR

The fund is classified as Article 8 according to the Sustainable Finance Disclosure Regulations (SFDR).

The sustainability indicator used by the fund is a minimum of 10% of the value of the fund's portfolio held in securities that the investment manager identifies as sustainable investments.

The percentage exposure of the fund to sustainable investments is:

	Target Minimum Commitment %	Fund Exposure %
Sustainable Investments	10.0	27.8
with Environmental Objectives	0.5	6.7
with Social Objectives	0.5	21.0

## PRINCIPAL ADVERSE IMPACT (PAI) INDICATORS

Under the European Union Sustainable Finance Disclosure Regulations (SFDR), investment managers are required to take into account Principal Adverse Impact (PAI) indicators, a set of metrics that highlight the potential negative impacts on sustainability factors that result from investment decisions. This is integrated into our ESG analysis at a security level.

Some PAI indicators have limited data availability which may lead to misrepresentative values for the fund. In these cases, the metric value and data coverage are displayed as n/a in the following tables.

In addition, the investment manager considers the following PAI indicators at an aggregate fund level. Metric values are shown in the Base Currency of the fund (USD):

PAI Indicator	Metric Description	Unit of Measurement	Metric Value	Metric Coverage (%)
10. Violations of UNGC principles and OECD guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Percentage of total invested	0.0%	95.0%
13. Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of board members	Average ratio of female board members	22.1%	67.8%
14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Percentage of total invested	0.0%	75.9%

## GLOSSARY OF TERMS

**Metric coverage** - The percentage of the portfolio for which PAI data is available

**GHG** - Greenhouse gas emissions

**Scope 1 GHG emissions** - Direct greenhouse gas emissions by the fund

**Scope 2 GHG emissions** - Indirect greenhouse gas emissions made by the fund

**Scope 3 GHG emissions** - All other indirect emissions that occur in the funds value chain

**mtCO<sub>2</sub>e** - Metric tonnes of carbon dioxide equivalent

**Carbon footprint (Scope 1,2 & 3 emissions)** - The total greenhouse gas emissions per million invested in the fund

**GWh** - Gigawatt Hours

**Ktons** - Kilotonnes

**UNGC** - The United Nations Global Compact

**OECD** - The Organization for Economic Co-operation and Development

**No data** - no data is available or can be calculated for the indicator

**RISKS - The following risks are materially relevant to the fund (refer to prospectus for further details):** Contingent convertible bond - Contingent Convertible Bonds may be subject to additional risks linked to: capital structure inversion, trigger levels, coupon cancellations, call extensions, yield/valuation, conversions, write downs, industry concentration and liquidity, among others. Credit - Credit risk arises when an issuer's financial health deteriorates and/or it fails to fulfill its financial obligations to the fund. Default - Default risk may occur if the issuers of certain bonds become unable or unwilling to make payments on their bonds. Derivative - Derivatives may be used to create leverage which could expose the fund to higher volatility and/or losses that are significantly greater than the cost of the derivative. Distressed or defaulted debt securities - Distressed or defaulted debt securities may bear substantially higher degree of risks linked to recovery, liquidity and valuation. Emerging markets - Emerging markets are less established than developed markets and therefore involve higher risks. Frontier markets - Frontier markets are less mature than emerging markets and typically have higher risks, including limited investability and liquidity. High yield bond - High yield debt securities are generally subject to greater risk of issuer debt restructuring or default, higher liquidity risk and greater sensitivity to market conditions. Interest rate - Interest rate risk is the potential for losses in fixed-income investments as a result of unexpected changes in interest rates. Liquidity - Liquidity risk may result in securities becoming hard to value or trade within a desired timeframe at a fair price. Total Return Swap - Total return swap contracts may expose the fund to additional risks, including market, counterparty and operational risks as well as risks linked to the use of collateral arrangements.

**General fund risks - to be read in conjunction with the fund specific risks above.** Counterparty - Counterparty risk may materialise if an entity with which the fund does business becomes unwilling or unable to meet its obligations to the fund. ESG and sustainability - ESG and Sustainability risk may result in a material negative impact on the value of an investment and performance of the fund. Geographic concentration - Geographic concentration risk may result in performance being more strongly affected by any social, political, economic, environmental or market conditions affecting those countries or regions in which the fund's assets are concentrated. Hedging - Hedging measures involve costs and may work imperfectly, may not be feasible at times, or may fail completely. Investment fund - Investing in funds involves certain risks an investor would not face if investing in markets directly. Management - Management risk may result in potential conflicts of interest relating to the obligations of the investment manager. Market - Market risk may subject the fund to experience losses caused by unexpected changes in a wide variety of factors. Operational - Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes.

## ADDITIONAL DISCLOSURES
