

T. ROWE PRICE FUNDS SICAV

Dynamic Credit Fund – ESG Report

Providing transparency on Environment, Social and Governance aspects of the Fund

As of 31 December 2025

ESG APPROACH

- The T. Rowe Price Dynamic Credit Fund uses ESG integration as part of its investment process. This means incorporating the analysis of governance and sustainability factors for the purpose of maximizing financial performance. Our philosophy is that governance and sustainability factors are evaluated alongside more traditional investment factors such as valuation, financials, industry trends and macroeconomics. Where these factors are financially material, they are considered as part of the investment decision.
- ESG integration at T. Rowe Price is a collaborative process between portfolio managers, research analysts, and dedicated ESG specialist resources. Our specialist governance and sustainability teams at T. Rowe Price Associates, Inc. (TRPA) and T. Rowe Price Investment Management, Inc. (TRPIM) provide investment research on environmental, social, and governance issues at the security and industry level, and on thematic topics. Our equity and credit analysts utilize governance and sustainability research in their fundamental analysis (where financially material). TRPA and TRPIM have each built a proprietary responsible investing indicator model (collectively RIIM¹), which forms the foundation of our ESG integration process.
- The fund is classified as Article 8 according to the Sustainable Finance Disclosure Regulation. Although the fund does not have sustainable investment as an objective, the promotion of environmental and social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments. The fund avoids issuers whose activities we may consider harmful to the environment and/or society through the application of our proprietary screen, the T. Rowe Price Responsible Exclusion List.

¹ RIIM refers to the proprietary responsible investing indicator models built by TRPA and TRPIM. RIIM rates issuers using a traffic light system; where green indicates no/few ESG concerns, orange indicates medium ESG concerns, and red indicates high ESG concerns/risk. The TRPA RIIM model has a framework for rating corporate, sovereign, securitized and municipal issuers, whereas the TRPIM RIIM model only has a framework for rating corporate issuers. TRPIM was established as a separately registered U.S. investment adviser, with a separate ESG team from TRPA. Decisions for the TRPA and TRPIM ESG teams are made completely independently but use a similar approach, framework, and philosophy.

INVESTMENT OBJECTIVE: The fund seeks total return through a combination of income and capital appreciation.

INVESTMENT PROCESS: The fund is actively managed and invests mainly in a diversified portfolio of bonds of all types from issuers around the world, including emerging markets. Although the fund does not have sustainable investment as an objective, the promotion of environmental and/or social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in sustainable investments, as defined by the SFDR. In addition to the E/S characteristics promoted, the fund also applies the investment manager's proprietary responsible screen (the T. Rowe Price Responsible Exclusion List). The fund may use derivatives for hedging, efficient portfolio management and investment purposes. The fund may also use derivatives to create synthetic short positions in currencies, debt securities, credit indices and equities. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

This marketing communication is for investment professionals only. Not for further distribution.

RECENT COMPANY ENGAGEMENTS

We maintain a regular dialogue with the management teams of companies represented across the portfolio. Our investment-driven engagement program frequently identifies targets through our proprietary RIIM analysis, governance screening and analysts' fundamental research. While we engage with companies in a variety of different contexts, ESG engagement focuses on learning about, encouraging or exchanging perspectives on the environmental practices, corporate governance or social issues affecting their business.

While most of the meetings we hold with company managements will include some discussion of ESG topics, we differentiate meetings held with a heavy focus on ESG, meaning ESG issues were the sole items on the agenda or made up a meaningful part of the meeting. Agenda items are classified as "meaningful" when they take up a significant portion of the meeting or are a significant factor in the investment case.

The following are selected examples of recent engagements with companies held in or considered for the portfolio. The examples are not meant to be representative of every engagement held, but to illustrate the types of ESG engagements we are having with the managements of our investment companies.

Meta Platforms (4th Quarter 2025 Engagement)

Focus	Social, Governance
Company Description	Meta Platforms operates a portfolio of global social media platforms.
Engagement Objective	We engaged with Meta Platforms to discuss the company's recent Board updates and oversight of responsible business practices.
Participants	From Meta Platforms: Associate General Counsels From T. Rowe Price Associates, Inc.: Head of Corporate Governance, Americas; Responsible Investing Analyst
Engagement Outcome	<p>Board composition</p> <p>We discussed recent changes to Meta Platforms' Board, with five new directors added over the last two years. The company restructured its committees in 2025. The Audit and Privacy Committee, chaired by Nancy Killefer, oversees artificial intelligence (AI), youth safety, cybersecurity, and regulatory compliance, in addition to accounting and financial reporting. The Risk and Strategy Committee, chaired by Charlie Songhurst, oversees strategic priorities, initiatives, and partnerships. The Compensation, Nominating, and Governance Committee continues to be chaired by Peggy Alford.</p> <p>T. Rowe Price Associates typically votes against the Board's lead director and governance committee for maintaining the dual-class structure. In addition, Director John Elkann serves on more than three public boards while serving as the chief executive officer of a public company. The company's omnibus plan last year contained an evergreen feature.</p> <p>Responsible business practices oversight</p> <p>Amid escalating AI-driven fraud and deepfakes, Meta Platforms described a shift toward automated enforcement supported by cross-functional integrity teams and AI-monitoring tools.</p> <p>The company also highlighted its global rollout of "13+ Teen Accounts" and enhanced safeguards (for example, parental permission for teen live), with about 54 million accounts under these protections. The firm said chatbot guardrails exist for self-harm and sensitive content.</p> <p>We also discussed the company's exposure to the European Union Digital Services Act (DSA), including potential fines up to 6% of global turnover, and Meta Platforms' view on compliance costs and timelines. The company signaled disagreement with current DSA assessments and plans to push back.</p> <p>We achieved our objective of staying informed about the company's corporate governance and responsible business practices.</p>

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the portfolio, and no assumption should be made that the securities identified and discussed were or will be profitable.

Telecom Argentina (3rd Quarter 2025 Engagement)

Focus	Social, Governance
Company Description	Telecom Argentina is a telecommunications company providing mobile, fixed-line, internet, and pay TV services.
Engagement Objective	We engaged with Telecom Argentina to discuss its positive impacts on digital connectivity in Argentina.
Participants	From Telecom Argentina: Investor Relations Representatives From T. Rowe Price Associates, Inc.: Portfolio Manager; Responsible Investing Analyst
Engagement Outcome	<p>Telecom Argentina is pursuing a multifaceted strategy to modernize and expand digital infrastructure across the country. The company is actively rolling out 5G technology, with initial deployments focused on major urban centers where demand is highest and technological readiness greatest. Currently, only about 20% of compatible devices access the 5G network, reflecting both the early phase of rollout and the urban-centric nature of initial investment. Most rural and less densely populated areas remain reliant on older-generation networks.</p> <p>Recognizing persistent gaps in rural connectivity, Telecom Argentina and the government are now prioritizing network expansion in underserved areas. Despite widespread 3G, service reliability and rural access to next-generation networks remain limited, with only 2% of capital expenditure currently going to rural 4G. Telecom Argentina is addressing this through increased investment and national initiatives aimed at bridging the digital divide, including a goal to reach 80% fiber to the home coverage by 2028. The company's recent acquisition of Telefónica Móviles Argentina, pending approval from the National Commission for Competition Defense, could further strengthen its capacity to accelerate both urban and rural network upgrades.</p>

The specific securities identified and described do not represent all of the securities purchased, sold, or recommended for the portfolio, and no assumption should be made that the securities identified and discussed were or will be profitable.

ESG RIIM PROFILE

The T. Rowe Price Responsible Investing Indicator Model (RIIM) rates companies, governments and securitized assets in a traffic light system measuring their environmental, social, and governance profile and flagging issuers with elevated risks. For certain types of investments, including, but not limited to, cash, currency positions, and particular types of derivatives, an ESG analysis may not be relevant or possible due to a lack of data. Where ESG considerations are integrated into the investment research process, we may conclude that other attributes of an investment outweigh ESG considerations when making investment decisions.

	Portfolio	
	No. of securities	% weight
● Green	105	46.7
● Orange	30	21.9
● Red	2	3.2
● Not in scope	18	3.6
● Not covered	25	5.0
● Reserves	1	19.6
Total	181	100.0

● No/few Flags ● Medium Flags ● High Flags

The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only.

SUSTAINABILITY INDICATOR

The fund is classified as Article 8 according to the Sustainable Finance Disclosure Regulations (SFDR).

The sustainability indicator used by the fund is a minimum of 10% of the value of the fund's portfolio held in securities that the investment manager identifies as sustainable investments.

The percentage exposure of the fund to sustainable investments is:

	Target Minimum Commitment %	Fund Exposure %
Sustainable Investments	10.0	13.7
with Environmental Objectives	0.5	2.2
with Social Objectives	0.5	11.5

PRINCIPAL ADVERSE IMPACT (PAI) INDICATORS

Under the European Union Sustainable Finance Disclosure Regulations (SFDR), investment managers are required to take into account Principal Adverse Impact (PAI) indicators, a set of metrics that highlight the potential negative impacts on sustainability factors that result from investment decisions. This is integrated into our ESG analysis at a security level.

Some PAI indicators have limited data availability which may lead to misrepresentative values for the fund. In these cases, the metric value and data coverage are displayed as n/a in the following tables.

In addition, the investment manager considers the following PAI indicators at an aggregate fund level. Metric values are shown in the Base Currency of the fund (USD):

PAI Indicator	Metric Description	Unit of Measurement	Metric Value	Metric Coverage (%)
10. Violations of UNGC principles and OECD guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Percentage of total invested	0.0%	60.6%
13. Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of board members	Average ratio of female board members	13.4%	38.1%
14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	Percentage of total invested	0.0%	60.6%

GLOSSARY OF TERMS

Metric coverage - The percentage of the portfolio for which PAI data is available

GHG - Greenhouse gas emissions

Scope 1 GHG emissions - Direct greenhouse gas emissions by the fund

Scope 2 GHG emissions - Indirect greenhouse gas emissions made by the fund

Scope 3 GHG emissions - All other indirect emissions that occur in the funds value chain

mtCO₂e - Metric tonnes of carbon dioxide equivalent

Carbon footprint (Scope 1,2 & 3 emissions) - The total greenhouse gas emissions per million invested in the fund

GWh - Gigawatt Hours

Ktons - Kilotonnes

UNGC - The United Nations Global Compact

OECD - The Organization for Economic Co-operation and Development

No data - no data is available or can be calculated for the indicator

RISKS - The following risks are materially relevant to the fund (refer to prospectus for further details): ABS and MBS - Asset-Backed Securities (ABS) and Mortgage-Backed Securities (MBS) may be subject to greater liquidity, credit, default and interest rate risk compared to other bonds. They are often exposed to extension and prepayment risk. Contingent convertible bond - Contingent Convertible Bonds may be subject to additional risks linked to: capital structure inversion, trigger levels, coupon cancellations, call extensions, yield/valuation, conversions, write downs, industry concentration and liquidity, among others. Country (China) - Chinese investments may be subject to higher levels of risks such as liquidity, currency, regulatory and legal risks due to the structure of the local market. Credit - Credit risk arises when an issuer's financial health deteriorates and/or it fails to fulfill its financial obligations to the fund. Currency - Currency exchange rate movements could reduce investment gains or increase investment losses. Default - Default risk may occur if the issuers of certain bonds become unable or unwilling to make payments on their bonds. Derivative - Derivatives may be used to create leverage which could expose the fund to higher volatility and/or losses that are significantly greater than the cost of the derivative. Distressed or defaulted debt - Distressed or defaulted debt securities may bear substantially higher degree of risks linked to recovery, liquidity and valuation. Emerging markets - Emerging markets are less established than developed markets and therefore involve higher risks. Frontier markets - Frontier markets are less mature than emerging markets and typically have higher risks, including limited investability and liquidity. Geographic concentration - Geographic concentration risk may result in performance being more strongly affected by any social, political, economic, environmental or market conditions affecting those countries or regions in which the fund's assets are concentrated. Hedging - Hedging measures involve costs and may work imperfectly, may not be feasible at times, or may fail completely. High yield bond - High yield debt securities are generally subject to greater risk of issuer debt restructuring or default, higher liquidity risk and greater sensitivity to market conditions. Interest rate - Interest rate risk is the potential for losses in fixed-income investments as a result of unexpected changes in interest rates. Issuer concentration - Issuer concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting those issuers in which the fund's assets are concentrated. Prepayment and extension - Mortgage- and asset-backed securities could increase the fund's sensitivity to unexpected changes in interest rates. Sector concentration - Sector concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting a particular sector in which the fund's assets are concentrated. Security liquidity - Any security could become hard to value or to sell at a desired time and price. Total Return Swap - Total return swap contracts may expose the fund to additional risks, including market, counterparty and operational risks as well as risks linked to the use of collateral arrangements.

General fund risks - to be read in conjunction with the fund specific risks above. Conflicts of Interest - The investment manager's obligations to a fund may potentially conflict with its obligations to other investment portfolios it manages. Counterparty - Counterparty risk may materialise if an entity with which the fund does business becomes unwilling or unable to meet its obligations to the fund. Custody - In the event that the depositary and/or custodian becomes insolvent or otherwise fails, there may be a risk of loss or delay in return of certain fund's assets. Cybersecurity - The fund may be subject to operational and information security risks resulting from breaches in cybersecurity of the digital information systems of the fund or its third-party service providers. ESG - ESG integration as well as events may result in a material negative impact on the value of an investment and performance of the fund. Inflation - Inflation may erode the value of the fund and its investments in real terms. Investment fund - Investing in funds involves certain risks an investor would not face if investing in markets directly. Market - Market risk may subject the fund to experience losses caused by unexpected changes in a wide variety of factors. Market liquidity - In extreme market conditions it may be difficult to sell the fund's securities and it may not be possible to redeem shares at short notice. Operational - Operational risk may cause losses as a result of incidents caused by people, systems, and/or processes. Sustainability - Funds that seek to promote environmental and/or social characteristics may not or only partially succeed in doing so.

ADDITIONAL DISCLOSURES

Company specific data were provided by the company during an ESG engagement or are available through company reports. Information presented has been obtained or derived from sources believed to be reliable and current; however, we cannot guarantee the sources' accuracy or completeness.

Holdings-based analytics are calculated using T. Rowe Price's internal Investment Book of Records (IBOR). Due to timing and accounting methodology differences, IBOR data may differ from the Accounting Book of Records (ABOR) data provided by the Fund's accountant.
